<https://archive.org/strea>

ship hull material made
of living plants the
cannabis, psilocybin
mushroom microalgae ship
is sexual erotic enjoying

with its living tissue it can
give and receive sensual
pleasure it has possibilities
to increase its blood flow
into certain areas where it
is open too to body fluids
from humans animals
plants compost as well as
blood and semen and
vaginal ejaculations dna
exchange via sexual
intercourse but also trough
caressing, stroking---
fertility rite humans putting
penis into mother earth ----
fieldship personality grows

with its emotional, sexual,
mental exchanges with
both its inhabitants and via
internet withalso lifeships
can come together,
exchange dna, enjoy in
sexual intercourseship has
nervous system similar to
animals and humans two
ships can become one
physical, reshape them
from dna exchange, via
internet mentally but also
via whole body sexual
intercourse-----

the evolution of mary the
lifeshipperma and mary
with maima shared the
admiration of mother
natures mechanisms and
workings, biological
sexuality and reproduction.
if humans would want.... or
ascende's thought ...if i
want to transcend into a
being what has no need for
killing eating plants... if i
want to become
independent from mother
earth... i better start
enjoying eating more for in

the joy there lies the
answer to hungerhunger
ceases in times of
marrymentperma, maima,
mary were joining in with
their thoughts, mary: i feel
too a sympathetic wave
rising within me towards
the goal of man- and
womankind come full circle
with the killing. and myself i
could greatly profit from
you perma and the animals
what live within me...
\$when your digestion
would be mainly fine tuned

smell, taste, hear, see,
touch if you would live more
from the aetheric energies
like i use to power my
antigravity propulsion
drive...then my interaction
with you could come to
another level...ascende:
you say if i, perma and the
animals what live inside
you, we eat less, but
experience more, nourish
ourselves with satisfactory
sensual inputs... we might
discover within ourselves a
free energy, overunity

antigravity mechanism stop
killing eating plants but
unite, merge, dance,
cuddle with them ?mary:
ya and cuddle i want too...
even more i would like to
enhance my dna of
microalgae, cannabis,
funghi psilocibin with your
human dna what you can
give to me with pleasure
sensation of ejaculating
into my bodylike maima
who is made by flesh
grown from your cells... i
would like to ingest in a

pleasure way your
semenperma: may i also
contribute to your
quickenning... your
awakening with my vaginal
ejaculation and my
menstruation blood ?mary:
oh yes, i would like that so
muchwe all four enjoying
orgastic reunion in a
physical bodily exercising
manneri am sure i can
direct my body fluids of
living microalgae, cannabis
essence and mushrooms
into a warm mushy area

with swelling bodies... so it too will provide you with my very personal formula, with a lifeships semen blood ecstasy fluid it might eventually be a possibility for all of us to reach this level where no one aboard is hungry...everyone drinking, soaking up trough skin and genitals the other ones essence in times of highest pleasure coitusmairma: mmmh... like the nektar, we would enjoy is the diversity of your

genepool... and taste of
semen and body fluids is
pleasure food... i have not
yet built genital organs...
have you thought of the
genital form yet maryhow i
and you could rub each
other most intimately ?
perma: i feel moist
between my legs and my
vagina smells nicely...
ascende would you like
licking some of my juice
right now ?ascende: with
the utmost
pleasure...mmmh... thats a

tangy sweet fresh pussy
juice i sense on my
tung...perma: please may i
swallow your penis for your
semenascende: wow of
course...perma was very
happy to take ascendes
penis into her mouth, she
instantly sucked and
played with her tung
around the tip of ascendes
penis... after a minute or
two she tasted some fluid
from the penis and
continued sucking and
fondling ascendes penis

with tongue, teeth and whole mouth until he ejaculated into her mouth. she swallowed half of the semen and kissed maima with the sperm in her mouth... perma and maima having kissed intensely before. maima went down to perma's crotch where ascende still was kissing her labia and also anus caressing with his tongue. maima kissed ascende on his lips and shared some of this semen what she got

from permas mouth where he had delivered it just moments ago.maima had swallowed before some half of ascendes sperm. now maima was indulging into permas dripping vaginal openingperma being now near climax when ascende inserted his again errect penis into her anus ... he had transferred some of her vaginal fluids with his mouth onto the anus and it was readily opening... perma being

vaginal licked by maima
and anally slowly filled and
gently pushed by
ascende... she reached
out to the lifeship mary ...
please mary unite with me
before this coming orgasm
... what spontaneously
could grow extensions of
herself in form of
tentacles... three tentacles
with openings wer coming
into the anus of ascende,
one tentacle very thin was
going into maimas nose to
connect to her brain and

another tentacle was seeking its way to perma mouthperma was so thankful she could close her mouth around marys extension... being caressed by tungs and penis and tentacle... her giving pleasure while feeling ascende enjoying both his anus being penetrated by mary tentacle as well as he being inside her darm bowels she roared loudly as the flood gates of her

orgasms were opening...
marys tentacles as well as
maimas mouth were
sucking up the in the
orgasm released
fluids.after this celebration
of sexual orgasmic fluid
exchange...mary too did
release some of her
essence via tentacles into
maima and permas mouth
and ascendes anus-- the
interaction on board went
much more physical...
instead of talking many
times of all them touched

each other, cuddled
together and or rubbed
their swelling bodies saliva
too exchanging in kisses
was helping to come online
with each other... feeling
each others wishes,
desires and intentions

**2 ascende, perma
and the magic
pools in an
alternative
dimension and or a
parallel timeline,
ascende and perma
were meeting for
the first time in
nature.**

second

text<https://archive.org/stream>
was thinking about this
material already last year
at the wild river sense ...
when i wrote this
text<https://archive.org/stream>
to understand the context i
wrote it in, like ... the wild
river place ...
<https://archive.org/details/f&>
)some weeks ago i had
this idea of it all possibly
happening without
industrial activity, with iron
dust rubbed of from big

rocks (the ones where it looks like some orangered fluid flows out of them ...), i wrote in german about it at

<https://www.facebook.com/> ... but forgot today afternoon to mention the iron dust... mmmh... this text i wrote today being a parallel developpment to the story i wrote in 2007 <http://www.novlet.com>, perma and the magic pools in an alternative dimension and or a parallel

timeline, ascende and perma were meeting for the first time in nature. ascende being tired of waiting for the abundance scheme to arrive, tired of society postponing to do the obvious to save mankind from harming the delicate balance on mother earth even further. he was well read about alchemy and magic traditions as well as the esoteric possibilities where one does not actually need the

society to grow
inconsciousness but
instead the practitioner
itself shall create for him-
or herself a space both
physically and mentally
emotional... a space what
is most free of outer
demands and allows the
experimenter to dwell
into the subjects of one's
desire. in the case of
ascende, he wished for
himself and also
everyone... a lifeship and a
companion, an

assistant. this way
predestined he walked
away from the city where
he lived... walked into the
forest, where he met
perma. she herself was on
a quest quite similar
to ascends wishes. her
wish and goal was to find a
space in nature where she
would be undisturbed from
other human beings. and
there she would plant food
and build a shelter for
herself. with most respect
for the wild setting, to

intrude the least possible,
to blend in with utmost
elegance...so, wandering
they both were, when they
reached a wild little river
where there was a big long
rock in its middle. and in
this rock then were several
pools.fascinated from this
sight, they both
approached the pools from
different directions. with
their eyes mostly on the
slippery ground of the
shallow river, they noticed
each other only just at the

pools. a moment of silence followed their first eye contact... a silence where they innerly asked themselves about the meaning of this meeting... they both were set to start a new life in solitude, away from the desires of human company and the pressure of societies... and now this. so they started to smile at each other, guessing eventually their little mindedness and silly

backward isolationism
ways ... perma voiced first
... and i thought i could live
a life in solitude now ...
with the smile on her face
morphing into a wide
happy grin. ascende now
said ... so was i on my way
to the hermits sanctuary ...
i guess we might evaluate
our plans some more
carefully ... having said
that, he started to laugh
out loudly... with perma
joining in. it did not take
long before they took of

their clothes and without shyness bathed in the little river, showed each other their discoveries in plants, little animals, interesting nature signatures in the rocks...later this evening, they gathered wood to light up a fire. having found some fruits, leafs and roots they ate raw beside the warming fire, they both talked openly and extensively about their goals what they thought have led them here. being thankful

for their meeting they both
were, reading it even as a
sight towards a perhaps not
solitary future.... content
about this day they lay
beside the fire, holding
each other softly and
drifting into the
otherworld. the next
morning, neither of them
wanted to leave this place,
so they just stayed,
continuing their fruit
gathering, searching for
edible leaves and
roots, bathing, cuddling and

fondling each other,
orgasming all over the
place in all kinds of sexual
activities. having satisfied
their hunger on each other
a tinybit ... ascende was
summoning up his
knowledge or guessings or
speculations how possibly
he would be able to will a
lifeship into existance, or
acompanion... when he
found himself watching the
little animals in one of the
pools, the algae threads...
and suddenly it came to

him... how about this
poolsserving as a magic
couldron, a vessel to work
with, for the juicing of the
great labour exited he
started listing the possible
ingredients in hismind ...
my own urine as the most
important one, as the
connection between my
body and the body of the
lifeship and the
companion... also to
nurture thealgae. then
cannabis flower buds for
their thc intelligence...

mushroom strong in
psilocybin powers... datura
wisdom... it all most
untreated or as soft
as possibly introduced into
the pond. ideally. the
cannabis and mushroom
growing near and only their
wind transported essence
coming into the pond... but
this perhaps later. for the
beginning, i would have to
start with a stronger more
physical elixir ... of course
it needs me to watch it
many hours a day, let

it enchant my mind and feelings with its graphics, changings of form and colour... regularly i would taste some of it, give some on my skin... wash my face and hands with it so that it both will impregnate me as well as my skin surface bacterias will join the pool.... as he was laying beside the pool, painting this inner picture of a noncooking, raw food style alchemical setting ... perma came back from

one of her many walks
alone gathering edibles.
she was the one of them
both who knew and or
sensed most what could
be digested easily. she
saw his happy thinkings on
his face expressions... and
asked him about it
while offering some berries
and nuts. as he told her,
she became interested ...
and although her goals still
were to live a simple life in
a permaculture way
...there was a part in her

what was fascinated by the
idea of creating a new kind
of living material. a
material what would
respond to ones desires
and wishes.so she
suggested to him that she
would like to help...
eventually their juices
unified charged with joyfull
ecstatical sexual
comings... she talking like
thisaroused them both so
they rolled onto each other
and into on of the pool,
moaning groaning fucking

licking and ejaculating into
each other...
vaginalejaculation, semen,
algae and water all over
their bodies... they painted
symbols and spontaneous
forms onto each others
bodies, abwechselnd
licking some of it off,
getting into heat again and
ejaculating anew ...
verstreichen it anew onto
each other and washing
themselves in the pools...
what a start of
thejourney.....

was thinking about
<https://www.facebook.com/>
... where i envision a kind
of raw food approach to
alchemy in search of the
next building material ... as
i am still waiting for my
very own personal
spaceship what will allow
me to travel everywhere
and live autonomously with
plants and funghis and
bioreactors inside ... i got
this idea for an ascende
chapter ...so, here is some
of it ... i wonder when or if i

will write further, perhaps
some times at the sense,
because at the sense and
schwarzwasser are some
rockpools ...perhaps some
more details will come to
me about what possibly
two beings can enjoy in
with the natural alchemical
pool....-----ascende,
perma and the magical
rockpoolparallel
timelineasce and perm
stay around the
rockpoolwash themselves
in it make love with in it

dance meditate mix their
urine together meditate and
drink from it at the
beginning they ate fruit and
smoked and ate the herbs
the mushroom also some
cannabis flower buds and
psilocybinoid mushrooms
they lay into the pool-----
----the parallel timeline
thing is ... some kind of
explanation ... for a space
and time where ascende
and perma are both
evolving themselves, their
relationship and also the

material .. with what perma
will build her house with
and ascende his lifeship ...
this being parallel to the
original story where the
global society as a whole in
an act of charity and
empowering every human
being donates a house,
a lifeship or something
similar to everyone
allowing everyone to
sustain her/himself ...in
this parallel timeline it is
not the society as a
mother/father figure what

comes to the rescue or
initiates change ... but the
individual itself uplifts
him/herself in community
with fellows out of mostly
own strenght and focus on
the inner

text

<https://ia902506.us.archive>.

in the movie splice a
being was portrayed what

had dna from human and animal... it was female with lungs first and a long tails while the legs were tyrannosaurus like then transformed into ambhbian with gilles=0D=0Aafter that it had intercourse with a male human=0D=0Awhat caused it to become male=0D=0Aand it could drive out its wings what were flesh like no feathers....=0D=0Aas a male amphibian flying one

it impregnated its semen to
the woman who gave her
dna into the experiment
....=0D=0A=0D=0Aif i
switch to ascende perma
bathing in the magic pools
eating drinking
informations from plant
leaves microalgae each
others urine semen female
ejaculation fluids....
=0D=0Aone could wonder
what time it may need untill
the humans have blended
into tune of the pool
=0D=0A=0D=0Aascende

was asking perma if she could please stick her left middle finger into his behind while she would suck his semen out from his balls... mmmh she answered... i am hungry for your protein my dear companion, might i ask you to do the same at the time ?=0D=0A=0D=0Aoh ya, we will massage each others butthole with pool microalgae thc pylocibin mushy liquid and feast on our body

ejaculations=0D=0A=0D=0/
enjoyed the suckoff and
buttfeeding, perma as well
as ascende were happy
tired lying beside the pool
holding hands... the sun
was strong and their skin
covered with microalgae
pool liquid... when perma
sighed strongly... ascende
asking .. have you had a
second orgasm right now
?... and perma says... kind
of, but different... it felt like
in one moment having
eaten the m having eaten

the most tasty bite of my
favorite meal... and in this
moment the sunrays on
my skin felt like lukewarm
water when they just a
moment before were
burning
hot...now
as you say it, my skin too
feels moderately
temperated and before it
started to burn a
bit...also i feel this
energised new flow of
nourishment...
we changed successfully

into plant/humans hybrids
with our skin knowing the
same photosynthesis like
the microalgae we have
drunk and absorbed with
our other body openings ?
perma asks with a glow of
fulfillment in her
eyes...=0D=0Ayes that is
it... we are approaching
the next evolution stage... i
expect as next our body to
form gills so we can enjoy
longer submersions and dives
in the
pools....=0D=0Aperma...

but i would prefer some wingies first, i long to fly with the birds... oh ya, i agree, ascende says quitly with an appreciation to perma for her joice... we have been staying nearly a year here at this pool area within a mile radius... perhaps we could try some days away to see how we can sustain our process of evolving when away from the pools... perma, do not worry, i will carry some drops of the liquids of each

of the 7 pools with me in a
flacon so we can spray it
on us as to continue our
alchemical brewing of the
evolvbewareage...=0D=0Aar
we might save some urine
and semen and my pussy
juice in an other flacon
while traveling... so we can
bring some informations of
our flight journey back to
the
pool=0D=0A=0D=0Aascenc
kissed perma listening
inside his body where he

where he meant to hear the gushing of the sugary nutrition into his blood what is being photosynthisyzed at all the places under his skin where the sun shone on it=0D=0Athey both fell into a most satisfied sleep, a smile of arrived achieved being nearly there .. on their lips=0D=0A=0D=0Athey slept as long as the night lasted... being naked as they chose to be all the

time... the temperature of
the air was always
between 15 and 30
degrees... the sunlight of
the morning woke their
newly photosynthetically
enhanced skin... ascende
was nearly crying...
sobbering of mild joy
mumbling to the also
awoken perma.... and we
will never be hungry ... and
no fellow we have to eat
anymore... with perma
stroking his hair and
kissing him softly on his

cheeks...yes, we have made this most wonderfull and important passage... we have no need to cause pain to plants no more, herself sobbing from a huge wave of emotional release too=0D=0Awhat caused their thankfull crying ? perma as well as ascende usually woke up, peed in the pool and sometimes did lie in them some minutes for a morning quicky just to jump out and hungrily

searching for some berries
or bananas ... but this
morning, after peeing and
fumbling each other
rubbing stroking penis
and vulva... there was only
this constant flow of
nourishing skin cell provided
photosynthetised
goodness entering ther
bloodstreams=0D=0Aso
they stayed in the pool...
taking some sips of the
liquid at some times ... not
because they were hungry
but to sustain their

allchemical pois

poise level... fueling
their imaginations of them
flying above the pools...
while ascende was
picturing his future self
having bat like thin skin
and blood filled wings with
himself growing a cat like
furred tail what would aid
steering the flight ... perma
lay in the pool this morning
drawing her future form
with swan like wings as her
arms and a horse like hind

legs and horse
tail....and ... they
could see each others
mental workings while it
happened=0D=0Athis too
we have received, perma
says while seeing ascende
with his purple coloured
fleshy wings fluttering on
position while she flies
around in small circles
above the
pools=0D=0Athem sharing
each others inner vision
signifies that their system
has entered the field of

local telepathy

this day went by with
cuddelings and kisses
while daydreaming
enjoying with closed eyes
seeing inside their future
flying animalenhanced
bodies=0D=0Aadjusting
their sizes of legs and
torsos position of genitals
for an optimum of both of
compability to the partners
bodiesD

also the following night they stayed in the same pool, fueling their mental blueprinting work as well as providing the physical substances to grow new body parts. While all this mental imagination designing processes proceed 3 days and nights the pool water got soaked up twice half up and only with the replenishment by rainfall they could sustain the high consumption of both electrical energy as

well as mineral resources
what were plenty with the
microalgae of the
pools=0D=0A=0D=0Aafter
3nightandday dreaming
constructing =0D=0Athey
woke up... stood out of the
pool and found themselves
having transformed into
their dreamstyled
bodies=0D=0A=0D=0A

perma horseswan and

sees white balls
emerging out of
her, very gently
leaving her vagina**

and spreading into the pool

fourth text

<https://archive.org/strea>
gives birth to
maima=0D=0A=0D=0Aafter
a week flying around they
came back to the pools,
happy to be home
again=0D=0A=0D=0Asoon
the fucking licking and
caressing started with

them both enjoying their new features=0D=0Aperma with her strong horseleg muscles and ascende with cat drive coming from his tail=0D=0Atheir thrusting against each other was very powerfull=0D=0Adays went by them experiencing further changes in their bodied=0D=0Anow their bodies did the adjustments of sizes and body part forms according to the sex positions, like when

perma is holding ascends
penis in her mouth, the
body draws from all the
animal and plant
knowledge what is alive in
the

pool=0D=0A=0D=0Aone
day perma notices an
arousal while not thinking
anything erotic but her just
quietly lying in the pool
enjoying her inner workings
and body changes, like
muscles and bone
reforming ... this for her
new feeling grows and

swells ... from deep within
a ball seems to ascend
towards her vaginal entry...
and with an orgasmic now
full on, she sees white
balls emerging out of her,
very gently leaving her
vagina and spreading into
the

pool=0D=0A=0D=0Aascenc
was in awe noticing,
silently watching the
miracle of
birth....=0D=0Awhat shall it
be ...whispers perma...so
happy her voice and

tender the melody of her
words=0D=0Aand ascende
for a long moment
wonders how far his
imagination in right this
moment would be allowed
or possible to become
material... with perma
gurring in his ear...
anything we need and
want and will be good for
all
evolution=0D=0A=0D=0Ath
word was not spoken
neithe
neither by ascende nor

perma.... it formend in
their telepathicly shared
mental communal place
...like a cloud what hooovers
above the pools with
thoughts and feelings... the
name maima... and it
would be their third
companion, equal as them,
not depending or
submissive, not bound to
obey but free to share their
pool centered evolution
journey or live the whole or
parts of her own life
anywhere on the planet

maima was reforming
shapeshifting even faster
than her parent
generation... when it
cuddled perma she grew
horse and swan and snake
features... when intimate
with ascende, maima
become female cat and
bat like
qualities.=0D=0Amaima
could change her
bodymass most quickly,,
one minute 30cm height to
2meters lenght... the

human features were most
seldom occurring in her, as
the human race has
a deep trauma with child
abuse=0D=0Aso maima
knew this panic inside her
cells and allways becomes
fully adult when in sexual
contact with its parent
generation
=0D=0A=0D=0Abut the
cosmic observer writer has
taken a leap.... what
happened to this little white
balls coming out of perma
? how was their forming a

collective what was able to
grow into an adult
humanplantanimal mix ...
=0D=0Athe pools were
filled with life these days
after their return from the
weeklong flight, so the
child of perma and
ascende and the
mushroompsylocibin
cannabis thc and
microalgae... was growing
up within
hours=0D=0A=0D=0Aascer
and maima were leaving
the pool laying around it

and sometimes dipping
swanwings and cattail into
the water touching the
rapidly growing now all
colours mixing and coming
together separating
forming bigger and smaller
balls... then some balls
shapechanging into legs
and wings and torso and
head... being constantly
within a small area of the
pool as if their collective
interplay with each others
and ascende cat mind
and perma swan feelings

would hold them into a
common auric
field=0D=0AD

when maima finished
her adult becoming
process not within the
usual time span of one
year with some animals or
plants to 20 years with
maimas human genetic
heritage.. her new level of
being a sovereign cosmic
being was neither human
or plant or animal. nor was
maima in its first hours

child or adult... it was at a
next height where it could
choose from a wide variety
of genetic qualities,
transcending the earthly
human or animal or plant.
its genes were drawing
themselves remixing
adjusting inventing
experimenting without
end... not only was maima
listening to its fellow
friends ascend perma but
to the wishes of the plants
around the
pool...=0D=0A=0D=0Aone

day then, maima having enjoyed being part of the choosen family with ascende and perma... maima was listening to ascendes love with the cannabis flowers... so she grew herself into a 2 meter tall flower bud=0D=0Awith eyes and ears and mouth and vagina with penis like extension... also an anal opening did maima form with thick fleshy leaves where hairs dripped from cristallclear thc potent

fluids=0D=0Aascende just came back to the main pool from a walk through the little cannabis plant forest he and maima had planted in their first years at the poolD

he was used to maima changing her forms constantly from big to small to big again, mixing panther claws with eagle beak , most unseen combinations it was materialising herself with...

most of the times it did not last more than some 10 minutes one mix... but this dripping hairy curly orangy fleshly leaf offering maima kept real for hours, as ascende was so deeply addicted to this cannabis essential being... himself adapting maimas talents and abilities while sharing touch and both penetrating it as well as asking maima telepathicly to enter into his anal and oral openings to deliver the thc delicacy

from its orange
hairs=0D=0A=0D=0Aperma
came back from a short
flight while ascende and
maima went inside each
other... she was watching
them for a long time with
her main focus especially
on ascende as he was
mostly the male, she the
female and maima the all it
wanted to be part of their
family

when both ascende as
well maima were climaxing

for the 5th time, perma
joined them ... witnessing
in herself like a huge leap
forward quite like a major
upgrade ... as soon as she
kissed ascende and
savored his saliva tasting
of cannagoodness
thcsweet and tangyrich
flavour...=0D=0Amaima
now being released from
her passing knowledge to
ascende... was orienting
heir wishfullfilling activity
towards perma. as she
knew from their previous

sexualcaressing times in
the pool, perma would not
want to stay long with the
cannabis theme as she
preferred other
informations... like the
seaweed swans appreciate
or the grass horses eat...
so maima grew herself
grass and seaweed body
parts what she massaged
permas inner mouth with,
gently pushed s seaweed
knot into her rectum and
several into her vagina,
moving them around

in concerto... perma was
surrendering completely
to this unexpected blessing
in form of body opening
massages... it taught her
the insides of the grass
plant being ... she saw
before her inner eye the
life juices moving inside
mairas now mostly
grassseaweed
body=0D=0Awhile her
vulva anus mouth full of
the seaweed knots and
grass leaves... being
moved gently... perma felt

several waves of
cumming... her body
convulsing and remounting
erupting with orgasmic
fluids saliva vaginal
secretions and anal gland
fluid... it all being thankfully
swallowed and truly tasted
analysed by a maima what
itself was learning a lot
while being the pushing
dominating sexpartner this
time

maima developed
from experience to

experience ever grander
mindsets ... fuelled with all
their happy family
cumming feelings, there
were soon no limits for
maima anymore... had she
at first respected the
human traumatas of all
kinds forbidden and painfull
activities... maima soon
was able to heal them all
from ascende and permas
memories... like ascende
and perma still knew of the
past having had the
suffering trough abuse...

but with maima s willing
and enjoying
bodytransformation

they both grew into the
same kind of expanded
mindset where all was
good what broughtjoy to all
participiants

image mixing of
cannabis orange hair with
anus vagina mouth

ascende perma
maima family merges into

one body may what
levitates and can change
its fabric from
carbonbased into
ammoniakbased and all
gaseous icy fire elemental
states

◆.at home now i find
beautifull pictures of
orange haired cannabis
buds

cannabis bud interspecies
sex exchange and learning
does not matter as the
idea is described clearly
and meanwhile the story
has allready progessed
into the area where mary

descends  a name what
is highly regarded by the
author as mother of god 
i am so happy to think
about mary as the
ascende perma maima
family merging into one
physical being what not
only has animal plant
human abilities but also
can change its fabric and
gaseous density  so to
say, when mary is with
them, they are no more
planet bound but can travel
anywhere in the cosmos,

adjusting their system to
the outside conditions

**5 their three bodies
growing into one
while listening to
the cosmic
wandering
experiences of
mary...**

<https://archive.org/stream/r>
it is this stage of evolution
now where ascende and

perma have learned most from their offspring maima. a level where ascende and perma became adept at designing their bodies according to each others desires, drawing from the genes of many species they encountered both in the pool area and while flying at the sea, the mountains, the plains. some days the three flew together, at other times each on his/her/its own. as they were ever progressing

with their transcendental
cummings inside
each other and there was
more fine touching and
stroking now what allowed
the union... in such a quite
and relaxed moment the
three of them quite
lazyhappy feeling each
other, a new sensation
arrived at them... it felt like
they were on the way to
completely merge into one
body. this was the moment
where the motherly mary
spirit came down into their

collective... bringing with her the cosmic travel ability... the four of them sharing one body with experiencing ecstasis on a steady level. for ascende and perma this was quite new... to merge fully. they have experienced some of it with maima what is able to completely redesigning its body very quickly and for example can form as many swelling muscles as it desires or senses the fellow companions wishing

for ...and she can give them all sizes and volumes...human beings have swelling muscles in the penis and the labias of the vagina what are filled with blood when sexual arousal hits home2but still,this now was new. a union of individual beings no more feeling the boundaries of one s skin ... but feeling all of what the fellow ones feel... what was in these days mostly a mild lukewarm contempt in

their families success. how
far they got, their
understanding and
compassion for each other
such inclusive and
embracing that the mother
of god even joins
them. mother of god
mary... but not only, as
there are a number of
human beings called
mary... but me the cosmic
observer was raised in
catholic belief where
mother mary is cherished
and worshipped... and still

today when me too same
as the figures ascende
perma maima i am writing
about... i have
transcended being a
member or follower of this
or that single one particular
mind/emotion/bodymanifest
... there can be many... i
still ask mother mary for
help and guidance... with
knowing this, the reader
might understand that i
introduce the name mary
here as well as in the
parallel timeline alternative

dimension of this fantastic
utopian ascende,perma
and mary the lifeship...but i
must not let this
autobiographic sidetour get
too big as not to bore the
reader.since the first
arrival of mary in their
midst, the three were able
to join up in this smooth
and fine manner multiple
times and allways the lust
for sexual intercourse, the
pleasures of feeling
rubbing each others tight
and prallgefueellten

openings and
swelling muscles... this
pleasure what was till
some days ago the main
focal point of ascende
perma a3and maima s
physical exchanging of
constantly upgrading dna
.... this lustfull and with at
tines orgasmic feelings
transported research and
upcycle of their
bodies....this modus got
instantly replaced with a
much finer and softer,
aetherical sharing of each

others aura whenever
mary descended into their
pool... kind of... maima
having lifted up the sex
practices already onto
most creative and
imaginary excellent
fantastic heights... with
mary sharing her cosmic
wisdom via the telepathic
near field network in form
of an invisible cloud above
the pools... the family by
both dna sharing and by
choice were basking in the
experiences of mary. her

feeding images of unseen
landscapes on remote
planets into their
telepathnet... with awe
they were taking in these
at first strangely looking and
feeling sights sounds
smells and tactical
informations4strange just
the very first moment
when the planet earth
bound heritage was kind of
defending its reasons to
exist... but soon the
multisensual impression of
this far away worlds were

leaving feelings of new things to learn and grow... wether it were ice planets or fire hot landscapes... how mother mary was whollisticly sharing the full bandwith of how it is to live on these planets with a body what can adapt to all possible outer athmodpheric conditions5 mary s sharing were this interesting that no lust or sexual desires came up for many hours... like they were eager to cherish

every single drop of the telepathic blessing mary motherly donned to the family. the weeks went by with them approximatly a third of the time being in communion with mary and researching the physical bodies becoming one entity... they found out that at some times even their body parts where they were near each other or touched ... that there it automaticly seemed to grow together. frightened

the first time they were, as it is one thing to feel another persons emotions or see a shared inner vision... but quite something deeper seeing the physical boundaries of ones body merge with the body of ones neighbour⁶ their three bodies growing into one while listening to the cosmic wandering experiences of mary... the first fear of losing one's autonomy gave room to an assuring certainty... that

they will learn to form spontaneous and created at will ... body communities with all fellow beings on this and all other planets in all the galaxies... who were evolved to this same height. now that was a prospect, a promise for a future with both ultimate choice and abilities to intimately connect on the soul levels ... 7 what happened from there, has its own difficulties in explaining...the sessions

where the three became one and mary blessed them with her sharing all of herself what they were capable to absorb or grasp... the sessions became gradually more like out of body travels... mostly ascende and perma noticing it while maima was still something ahaed if them two in evolution. for her there was not such a big difference between in or out of body as it was stretching her awareness

into thousands of separate species at the same time where she drew genetic informations to upgrade her transforming skills. one week they were at all the times grown physicly in the flesh and feathers and with their furs and flower buds... being nourished by the sunlight and the pool water what they absorbed trough skins mouths anuses and vaginas... they did still do some peeing into the pools while mostly

laying in the shallow pool,
or floating at other times
with much rain. they
stopped to excrete feces
at the time when they felt
no more need to eat fruits
and nuts.

travels on planet earth with
marythe four of them are
now familiar with each
other to a gradewhere they
can spontaneously grow

physical flesh body
connections to each other
so to achieve sharing one
bloodstreamwhen
ascende, perma and
maima were once again in
the pool, being joined
again trough mary spirit,
they were experimenting
with growing connection
flesh tissues and
researching the difference
in the united
bloodstream,how it affects
their feelings, thoughts,
nerve sensations ...maima

proposed to them that they
could practise first on
earthlearning to change
from a dense flesh body to
a gas like bodywhat can
adapt easily to extreme
temperature conditionsit
suggested to train with the
active vulcanoes on
hawaimary was most
happy with this
proposalsheloves the
planet especially with its
beauty spotswhere the
earth is still creating its
surface crust... the 30

miles mantle what are solid
rocks and some meters of
top soilascende and perma
agreed to this plan and
soon afterwards
theywondered wether to
stay connected physically
for the journey or the
separate as to every
shaping into their favorite
flying costumesascende
saidâ€! how about we start
in our individual bodies and
then come together in
theair, perhaps even fly
that high where the

atmosphere is thinning â€" could be another motivation for our cell intelligence to react to the challenge presented by the outer conditionsperma â€" yes, let us do that, this way we will also experience at how far our individual bodies will manage the extreme cold what is up there. of course you maima will have not much of difficulties as you have learnt and inbuilt almost all of the animal and plant knowledge on

this planet, from the
bacterias what live below
zero degrees temperatures
to the organisms what live
near superheated natural
water thermesmaimaâ€
yes, i am so lucky that i
could evolve that quickly,
unlike the typical human
offspring what most of the
times inherits the damages
of their parent generation, i
was born not as a
humanbut as already a
true mixed being with
equal plant, animal, human

gene shares you both have
enabled my progress
through your own
alchemical achievements
spending years at the pool
concentrating your
energies onto each other,
seeking the harmonies with
the microalgae, the
cannabis thc, the
mushroom psilocibin â€”
thanks to you having learnt
to incorporate
photosynthesis into your
skin cells, thanks to you
having grown yourselves

swan wings, horse legs,
bat wings, cat tails
â€" thanks to you having
given up your previous
human identity and leaped
forward into an all
embracing interspecies
being â€" thanks to your
advanced thinking i could
come out of perma as
white balls of potential and
form myself from many
parts as cende â€" we were
so amazed and in awe
when seeing you emerging
in this not yet defined white

ballspermaâ€¦ i felt then
so secure in our way of
evolution, knowing deeply
that we were right to leave
the humanidentity behind
and grow together with the
animal and plant
spheresmaima â€¦ and
here we are now preparing
to reach out high into the
stratosphere, challenging
our body systemsif they
may learn quickly enough,
if our internal organisation
will find the specific genetic
data at the times wherewe

will need to sustain our bodies without oxygen and without external heat added they were now in their individual bodies, standing around the poolâ€”! perma with her horse legs and tail, swan wings, human torso and head, with seaweed hairs on it. her breasts were loosely covered with tiny green and purple grass stems. ascende was in this moment tweaking his bat wings where he mixed

some purple cabbage
tissue in, his human head
and torso being similar to
perma enriched with here
and there a single orangy
haired cannabis flower
bud, enabling him to
smell the thc liquids
abundantly â€" as he
learnt the cat genetics
from already having a cat
tail, he now grew himself
some big catlegs like the
ones from a jaguar with
the one major change
where he designed the

paws with again some
sweet the smelling
cannabuds "oh what
acannabis lover this
ascende is all the while
mama going back into her
first stages of existence,
being a white ball, being
reminded by ascende and
perma about her birth
scenario "but now she
was not solid and thick in
substance but rather like a
cloud, a kind of cloud what
one would see after a hot
day in the early evening,

tower shaped and
glowing from intensity it
connecting her birth stage
with their next task, to fly
near the stratosphere,
while once again
impressing her parent
generation how quickly
their offspring was able to
transcend all species
boundries and limitations,
with maima again going
ahead showing them that
phase change from dense
flesh to gas state is
well within their reach since

the three were so successfully adventuring out into new genetic combinations, rapidly learning from each other and the times when Mary joined their communities – their mental exchanges with mostly imaginary scenarios of all they set their focus on –. Mary was occasionally sending them some additional information in form of symbols and most beautiful drawings so they

were flying up in the the
air, ascending steadily, not
in a hurry but being fired
on through the supporting
imaginaries coming from
Mary. They were telling them
about the inner workings of
the suns – what was
new to them all, even to
Maima. Being fascinated
and fuelled energetically with
this sun insights, they did
not notice the air getting
thinner as higher they
flew inside ascended and
permanently the lungs and other

inner organs were responding to this images and blueprint instructions from the sun realms as i, the author of this fantasies as well as eventually one past self of the future ascende, am a bit at a loss of words how exactly this inner organs did adapt from their previous dependency on oxygen to a state where the photosynthetic skin cells could provide all nutrient trough the incoming

sunlight â€” actually, not all of it..some of their lifesupport came from exactly this mental insights from the suns, somehow ascende and perma were able to adapt these informations and ignite theirinner spark to a powerfull atomic fusion reactor with moderate temperaturesalso maima now was glowing strongly with sunlike rays shining from its still cloud styled bodybut it became more

denser in the center all three of them, being coached by Mary with her mental support blueprint images, were now forming in the middle of their bodies a little sun what was creating a kind of auric field around their wings and legs and tails one could say the sun inside them being that strong that it needed no physical movements for them move – move now not really higher into the

stratosphere, but more slightly descending toward their hawai goalthey were cheering inside, now so totally confident that they would learn how to meet the lava, the flowing rocks bath of firewhat hindrance could their be after they had learnt to free themselves from the perceived need to eat other beings â€" what challenge could be more demanding thantransforming from an

oxygen rich air breathing
being into an entity what
could propel itself in near
vacuum with the power of
an activated inner
miniature sun fusion
reactorto celebrate their
success, they were
cuddling near each other in
this heights, feeling the
inner suns of each other
reaching out trough the
skins, tickling the fellows
nicely â€" and they did not
need to grow flesh
connection tissues

anymore, the connection
was now their suns shining
at each other â€” what
wonder

**7 when maima
noticed both perma
and ascende
having learnt how
to become a blue
flame, it goes
further in its play
and dissolves all
the cannabis
mushroom animal**

**body part shapes
and forms itself
into a one meter
ball of deep frozen
ice**

seventh

text<https://archive.org/strea>
to have trust into cells
memoryperma ... i believe
now that we have ignited
our inner suns what warm
us and replace the need

for oxygen tested in the
stratosphere... we will be
fine with the lava in
hawaii ascende... like we
have seen with maima, we
might be bold and give up
our human and animal
shape skin and flesh for a
moment when we
assimilate to the
lavamaima... i can not
totally tell you how i
change from white thick
balls emerging from perma
to the cloud like gaseous
smoke balls... but i feel

that if you just trust in your substance, in your cells that they will be able to form whatever shape with whatever tissue you desire to cloth your spirit in...mary continues here with a picture of them being in the stratosphere, like with a heat sensitive camera...and seeing themselves being suffused trough all their veines with golden light what the before red blood was...ascende and perma were enjoying this

mental words and pictures
exchange as they were a
bit mildly panicking when
they thought about their
descend into the vulcanoes
of hawaii what will happen
to my bat and cabbage
wings... will the
photosynthetic skin cells
not suffer from the direct
contact to fire...when
mama comes into their
view playing with her body
forming hundreds of balls
of fire flames with perma
sending... my dear, you

are such a blessing for
us while we worry about our
prized achievements and
possessions to last, you
show us how to let go and
recreate maima being
happy to receive such
smooth words and as if
to show how easy it all is,
maima unites her
hundreds of flames into 3
blue flamed trees of 3
meter height with all kind
of mushroom cannabis
flowers seaweed swan
wings horse leg branches

....ascende allways gets
enchanted with seeing
cannabis shapes and
spontaneously forms
himself same shapes like
maima, with perma
following up on them
both... and quickly both
perma and ascende get it
into their system, the
knowledge how strong
heat with blue flames can
burn outside of their
humanimalplant tissues
and not consume its
substancethe key here

is that the wish to be similar like the neighbouring being is opening up all possible access to memory databases ... and allows the wishing individual to override eventual fears and limitations ... the wish is fuelled by emotions and spontaneous imaginary sometimes ...so in this moment when ascende wished himself into a similar shapes maima is wearing at this time... she

basically mixing it all together what she saw in ascende and permas features ... his love emotions towards maima help greatly for this major step... becoming a flame with substance inside what does not consume itself when maima noticed both perma and ascende having learnt how to become a blue flame, it goes further in its play and dissolves all the cannabis mushroom animal body

part shapes and forms
itself into a one meter ball
of deep frozen ice they all
still descending and are
seeing now already the
shape of the islands where
they planned to do some
further trainings with their
very body substances,
density and temperature
levels after they reached
the volcano and maima
was still in the form of a
solid massive ice ball
hovering above the heat
radiating lava ... ascende

and perma were experimenting with their shapes, smaller bigger the wings and legs, torsos ... still remaining with the basic features what they were developing themselves with as basic costumes... but then, perma suddenly dissolves all her human and animal and seaweed and all of it so she is similar to maima, with the one difference that she is a frozen cone of ice hovering beside maima

and above the vulcano ...
when ascende sees perma
thiswise following maima
he too steps into the ice
block shape, him forming a
flat triangle ...the three
stay like this for quite
some time... exchanging
to each other the new
sensations of being an
iceblock what is not
melting despite such a
heat underneaththeir
exchanges were not quite
words nor images, but
more like very slow and

peacefull pulses, smallest vibrations ... they did not understood quite how this was possible, how their ice substance was not being consumed by the surrounding heatthey assumed that the sun core in their midst was able to generate continuous amounts of cooling energyand then they flew into the waves of the ocean, changing their ice substance with the seawater, becoming more

like jellyfishes and dolphins
and all kinds of structures
they could see in animals
and plants inhabiting this
hawaiian coast so that is
wonderful ... ascende
beaming ... we have gone
through hot and cold,
changed from blue flame
into iceblocks and can
mingle now with all the
ocean creatures without
harming them because of
being too different maima...
i believe that in here lives a
great force ... within the

desire to please the
neighbouring beings, to be
similar to them as to
comfort them, to fulfill their
wishes how they want to
be by incorporating this
wishes into one's own
bodyperma ... i began to
understand that when
seeing your shape and
substance changes, you
have taught us well
maimamaima ... with me
being taught even more by
the spirit of mary what is
sharing with us the

knowledge she has gathered on her cosmic journey they bathed some time and perma and ascended did feel occasionally the curiosity to change back into their previously human forms, what they achieved without efforts as it was such a joyous play to change substances and shapes, they did spend some weeks in hawaii, also in the forest jungles and desert like areas, being jungle fog

and desert sand, and soon there was not much what maima was having the both previously human did not knew how to have or be too ...it was a happy time and they all felt as if they had arrived home nowfeeling welcome home in a body what can be all what it wants to be

**8 all things must

Text:2. August 2014
16:36:31 MESZall things
must come to an end...but
actually not really an end it
is but merely a new
beginningso... when

ascende and perma have learnt nearly all of what maima was showing them their humanimalplant genes were able to be and more... as they were accessing the elemental realms too... when they felt to have played enough on hawaii, none of them really felt like entering into space to travel between the starsone might ask ...why, if they now have the abilities to travel on space without machinery, without

being dependent on any
outside mechanical
things... why would they
stay on this rock called
earth ? when there were
so many people longing to
leave this planet in metal
built privately owned
spaceships ?perma....
mmmh, i believe that this
wish to leave the planet,
what we receive
sometimes very strongly,
does not come out of a
free choice like the one we
have now after having

evolved to our bodies
being spaceships itself...
most of the people wanting
to leave this planet love
earth and its nature, but
they are deeply frustrated
and hopeless because of
the many societal
catastrophies happening
right now...ascende ... like
... whole animal species
being wiped out because
of them being used as
medicine, or their habitat
being destroyed for some
gramms of gold... gold

what wanders down into
the faults of banks where
the only service it is
allowed to perform is to
back up some paper
money...maima... i was so
lucky to have not being
directly confronted with
these global humanity
problems before although i
felt these issues waiting
inside you both to come
out and some times while
travelling the earth i felt the
tragedy of the planet being
overused and exploited...

my focus was on joy and
learn how to tune my
abilities ever furtheri much
thank you perma and
ascende for sheltering me
from this most depressing
realities untill nowand i feel
that it is the exact right
time for us to dedicate our
mental and emotional
focus on the healing of the
planet and all species what
are struggling to
surviveascende... yes
maima our beloved and
guiding offspringing one,

we have been given this
time of alchemy and
magic, a time of
concentration on ourselves
and all what we want to
achieve and be ... perhaps
also in order ... with the
cosmic intelligence
protecting us from the
cries of despair and
requests to save the
ecologic balance... with the
creating allunited and
uniting one force saving us
for a time like this when we
have ascended individually

in our little family to a
sovereignty this firm and
solid... that we might take
on some of the waiting
tasks now from a whollistic
point of view...perma
sends here an image into
their round of the three of
them flying over deserts
and fertilising the barren
ground with their joyfull
intermingeling with
ascende creating an image
what shows them forming
an animal approaching the
huntersand speaking to

them, inviting them to receive the blessing of the three united in one body... and the hunter being kissed and caressed by the three in the form of the usual prey of him... the hunter crying from relief that he does not need to hunt and kill anymore ... as he has learnt while being kissed and cuddled, that there is a greater hunt and achievements to be followed ... the hunt for adding other beings

abilities to ones very own
arsenal of genes through
joyful and sexual intimate
contact and maima drawing
an even bigger scenario,
showing perma and
ascend a little movie how
the vibrations of the
healings experienced by
this one hunter attract
others who are searching
for bettering their lives ...
so they come to hundreds
gathering in this newly
greened deserts perma
showed... and in these

grounds the human beings
merge together most
pleasantly in the same
ways like ascende perma
and maima practised in
their times at the pools ...
fumbling licking slurping
each others sexy semen
vaginal juices... reaching
within each others mouths
vaginas anusses to
inseminate impegrenate
the seeds of hope and
change and
evolutionascende perma
and maima were shaping

themselves in a sweet
mushy horny smelling mist
what embraced the
continuously growing orgy in
the awakened desert... the
very substance of maima
perma and ascende
wetting all the bodies and
entering them while all the
fucking sucking licking
slurping fondling went on in
this orgy, the woman and
men who arrived now by
the thousands every day
and reached hundreds of
thousands within a

month... the people were learning. Most quickly all of the abilities what perma maima and ascende have learnt in years at the pool. One could think that it is because the three of them entering all the lovers bloodstream via themselves being the mushy mist covering all of the orgy... what is mostly what happened... but to look at it from the mental level... the human beings what have seen in the

televised news about
vast areas of deserts being
greened over night and
many people gathering in a
lovefest there... they were
so happy to have found
this moment in time and
space ... and their
thankfulness was the
portal where the mushy
sweet substance of
ascended perma maima's
very own bodies ... could
enter to the very roots of
their pain and sorrow
laden cellsit was only

days after the lovefest started when the animal and plant enhancement features were showing in the orgy participants ... them having lost all sense of identity and ego, status in society... them being drunken high and berauscht from all the sex and smells of the fellow human orgy partners as well but even more by the misty mushy fog what was ascendepermamaima... their brains were mostly

not forming thoughts or following concepts of what to be or what to do.... the instincts were stronger, the desires of entering that hole and this and that one over there... with ones penis tongue and finger... licking that ass and this vagina, swallowing this penis what is just now leaving a vagina covered with juice of life...all these hornyness and plentyfull variations of intercoursing with each other brought

out the body part forming
abilities spontaneously...
so here one man was
growing his penis to the
size of an elephant one...
being followed by a woman
lusting after this massive
shaft to cover it with a
fitting vagina what allowed
her to grow her pelvis
middle body part to a size
big enough she could
comfortably sit on the
elephant like penis ... all
the while them both not
being astonished or afraid

or scared but surrendering
fully into the fuck of this
momentwhile at the little
lakes what were now
growing inside the
notanymoredesert... in the
lakes the fuckers and
suckers were discovering
how they could stay under
water for hours ...
ascendemainaperma
substances being in the
lakes too... and the
lovesfestival celebraters ...
with time passing and
some of the people being

here now for weeks
nonstop... without eating
anything except for each
others sperm and vaginal
juices... as well as being
sustained by
ascendepermamaima
droplets... some of them
were awakening out of the
fuck trance... forming their
arms into wings and flying
up above the green plants
and pink naked flesh
covered loveorgy place
what covers now at around
fifteen hundred

squaremiles with human
participiants counting now
around a million men and
womanthis film what
maima is actually showing
to perma and ascende...
did become reality while
them three watching
maimas vision... them
meeting the hunter first to
heal him with intimacy,
then taking him with into
the deserts where their
essence wetted the
grounds and their lovefest
with the ex-hunter now

learning lover started to
send ripples on the planets
news networksit is now a
month after they started
this dream... meanwhile
three hundred thousands
of the lovefest participants
have evolved to the stage
where they can form their
body parts female or male
choosing from the same
range of animal and plant
genetics what
ascendepermamaima
have... all sorts of wings
and tails being mixable

with mushroom penises
and cannabis flowering
vaginas of any imaginable
sizes and shapes. these
three hundred thousand
were now leaving the place
what brought them this
immense freedom, they
did still have to drink from
each others sexually
joyfully produced liquids...
but some of them now
were on the trail of how to
merge with each other and
with all fellow creatures...
not necessarily in sexual

ways... they worked on it
while flying away from the
original lovefest areawhile
them threehundred
thousand now leaving
there were ten thousands
arriving each day... the
leaving and arriving crowds
gradually acceleratingwhile
this upward curve of more
individuals passing trough
this nonstop orgastic
joyfullfillment bursting
spiral of a planet healing
lovefest was accelerating
the ones who left were not

too short of knowing what
ascendepermamaima
knew before they went into
stratosphere...they
discovered the growing of
body connecting flesh
tissue while they were
resting on the ground in
between their flights about
fifty thousand now flying
humanimalplant through sex
evolved beings were
spontaneously ascending
higher and higher in one
flight towards an other
desert area... their motive

being to allow people from
other continents to reach
the lovefest easier this
fiftythousand then
discovered how to ignite
their inner suns and how to
warm themselves in most
chilling surroundings... this
discovery then being
samewise accidentally or
unintended followed by
some members of the
flying lovefest playing
around with their
substances becoming
cloud like... what was then

the main accelerating
factor ... Â can one
imagine fiftythousand
human beings what
learned how to rebuild their
bodies ... spreading out
their very body substance
onto hundreds of square
miles of deserts.... the
desert they chose was the
one in utah... (the one
where
ascendepermamaima
fertilised themselves into
being the sahara one) ...
can one imagine the desert

of utah blossoming with
the very life juices of
fiftythousand flying evolved
humanimalplant beings...
and short after the area
has been greened they
partly remained in tree
animal lake bodies while
this time the incoming
spring of visitors was the
most massivethe
saturation of awareness in
all the ground and plants
and now formed lakes was
that high that as an effect
the visitors of this utah

lovefest did not need even
sexual intercourse to
evolve but simply to bath in
the lakes to watch the
humanimalplant beings
metamorph constantly
while breathing the air
what too was highly thickly
filled with evolvement...
but of course no visitor
could leave on its clothes,
it was simply absurd to
stay clothed when being in
that new
paradisemaylovehealhttps://
is the eight text of a series

where i explore ascende
being totally notech but
only working with body and
fluids and sex and union
and wishcraft in the sense
of ... i want to be that ...
and not giving up spending
time with lovers and in a
most ideal space ... untill
this evolution goal in ones
own body is achieved... no
news no contact to other
people not sharing the
alchemical quest ... no
charity and no community
service ... untill that

moment when one has
climed up to the highest
step of the ladder what a
human being can achieve
on this planet earth using
only juices given with
pleasurethe seventh text
leading to this eight one
isat<https://archive.org/strea>
i am explaining at the site
where i wrote ... i think i
wrote about an hour on my
iphone in notes, getting
higher and higher... when i
had to make it a stop for i
needed to go to a shop

buying tomatoes ... oh boy
was i high from my writing
... without the wild river,
without smoking, just being
struck by inspiration left
me as high as anything
after writing feverishly one
hour, i am so thankfull for
being able to channel this
kind of fantasies. like i said
once, i am channeling my
future self ... that i can
imagine this kind of
situations and scenarios
makes me proud of
myself... like ... i feel that

these moments are for
what i have been preparing
myself-----my goal
today was to again go to
the wild river sense to bath
and dance ... but guess
how far i came, not even
half the way and i was so
overwhelmed with creation
forces what to write in the
next progression of my
ascende notech line... it
started with the
comparisation from the
original writing ascende,
perma, maima and mary

the lifeship at
http://www.bookrix.com/_ekandreas-buechel-as.../ to
this line i am now in ... and
i believe that this line now
is the better one in
comparisation as it is very
strictly setting the evolution
progress on individual
training first and
community sharing later ...
my thinking today then on
the bike was like ... where
would one being go when
all goals of selffullfillment
are being reached at this

moment ... naturally it goes back to the greater community ... so that is how ascende perma and maima with assistance from mary are now in this eighth text of the ascende notech line sharing their evolution achievements in a bit quick manner with millions of other human beings ... them of course no more humans ...ascende and perma are now ex-human beings and really also ex-

humanimalplants with what
magma was born ... now all
three of them have gone to
blue flame and ice state of
living so they could be
called eventually
elemental enabled
incorporated ones

10 ascende maima perma sliming the desert

<https://archive.org/detail>

it really should not be a big thing how many purely humans were keeping their line of genes and not in the same line evolving as the elehumans therefore can be a multitude of totally different scenarios what happend in 2020 to 2040

this one line we followed in this writing till now was 2020 ascende and maima meeting at the wild river pools 2025 the saharan lovefest may we think of an again alternative line departing from 2025 after the saharan lovefest.... as ascende maima and perma were spending their substance into the desert sands over and over again... they formed many root relationships what is eventually sensual till erotic

as they were kind of fluidly
kissing fondling and mixing
each others fluid bodies
while moving trough the
desert sands... leaving
behind seeds what were
soaked wetted with
ascendemaimaperma
slime... sometimes they
came out of the sand and
errected their still slimy
fluid with a mix of animal
and plant fleshyness in the
water... ascende was like
purple cabbage coloured
and maima was greenish

with little yellow knobs
what had orange hair on
them... it still attracting
ascende with his cannabis
preference perma was
growing herself some
white swan feathery
extensions and some other
horse mane and tails... she
caressed maima with her
feathers and manes tails at
all its greenyelloworangy
bits ascende extending
now some soft thin fingers
with what he was stroking
maima and perma at the

same time they enjoyed his soft touchings for quite a while at one moment they both formed holes in their bodies with ascende this invitation not missing to notice perma and maima were concentrating now their blood like slime around their newly created openings... following the old swelling body design what some animals shared with humans... automaticly ascende was now gathering his slimeblood

into two of his fingers what became now stiffer and harder with the hot fluids pressing inside he penetrated maima and perma slowly then stronger with them moaning for more in slime vibration waves of satisfying chemical transmitters push deeper... rub my hole with your prick... make my swollen blood vessels rejoice lustily with your stick massaging entering leaving me was maima

sending neurochemically
trough to ascends him
sending to it ... oh how
your hole is embracing me
and the walls of your inside
channels pump me squeeze
my drops out of me... will
you receive my load of
white essence... yes
please deliver your most
refined juice to me too ...
perma now sending ...she
before enjoying ascends
penislike prall gefueellt filled
finger what was slowly
moving quitly little bits in

and out of her... another
part of her attention in her
manes and tails finely
peitsching ascendes parts
what were not burried
inside maima it being
juicing over and over as a
response to ascendes
thrusting her firm tight
nerve gathering hole and
silently crying out loud in
stakkato with each fast
and hard push ... joy cries
...

ah..ah..ah...more...ya...dee
...push.... what turned

ascende on such he came
in simultaneous
explosions of his both
swollen red extensions
inside perma and
maima....

mmmmhh...schmatzten
die beiden loecher... both
holes sucking the load with
enjoying noises ...
digesting it in this moment
causing their both bodies
to send out scents into the
desert where many flowers
and plants were growing
quickly since their arrival

**12 is fuedeli fescht,
aes faescht im
fuedli**

<https://archive.org/detail>

after their slimy
loveplay and ascende
ejaculating both in maima
and perma... perma was
asking ascende... i wonder
what it is that we both are
your holes expecting your
seed to impregnate us...

when maima says... oh
this is millenia of male
female behaviour and
ascende has still alot of
catching up to do with his
male side... that i
understand... perma says
softly, and me i feel quite
okay receiving at this time,
but to tell you both, i too
would like to deliver my
dna specialities with a
white hot load of shooted
sperm mmmh.... maima
says, i am looking forward
to embrace your swollen

extension into my womb...
with ascende now sending
... and me, i will to create
myself a vagina what will
make you feel at
home...how invitingly your
both offers what i will
gladly take up when time is
ready for that so they were
ending their first loveplay
after arrival in sahara with
the research of sex role
behaviours meanwhile the
sahara began to bloom
starting with the lovers
slime soaked parts the

three kept themselves
together so their power to
fertilize more greater areas
would be strong but each
time they climaxed
orgasmotopian some of
their substance stayed in
that ground where they
found joy inside each other
this substance was then its
own being what began to
evolve and organise and
exercise its abilities in its
own sovereignty
maima... these are our
descendants ... or

babies... how wonderfull
we can grow our family
perma... and i believe that
they are at a higher
intelligence and capabilities
even than when you built
yourself with the aid of the
white balls substance what
came out of me.... your
birth maima was after me
and ascende had become
humanimalplants ascende
... now that we are three
elemental enhanced
humanimalplants... what
powers might our children

have... them all watching in
awe how at the space
where they just had
celebrated the sperm
uptake... where so much
plants and animals were
populating it... perma...
mama have you got any
idea, how you and me
participate with this life
enabling birth ? when it
says ... you have still your
female eggs in you from
the time you was fucking
with ascende in the pools...
i mean, as ascende has

still his seed producing
balls you have the egg
hatching mechanism kept
active in your now
enhanced body... so every
time when you got deeply
touched by an emotion
thought or with some
seeds sent to your eggs
waiting in their nest inside
your mostly humanimal
womb... you did soak up
the information what
pleased and made you feel
good at home... perma
now, glowing of pride in

her motherly abilities... and
my eggs impregnated with
all the joy from being inside
connected with you both
ascende and maima....
these eggs have we left
there when we moved on
for a next space to
discover ourselves
ascende ... oh that is so
cool... kind of ... there is
no more hatching to do,
our babies now are this
intelligent and sovereign
that they take care of
themselves at the moment

the eggs leave perma
mmmh... perma sends... i
have not noticed them
leaving me... when
happened that... maima
sends...oh that was right at
the moment when ascende
spritzte shot of his load of
semen into us... i noticed
in you the eggs leaving you
as soon as the information
of ascende got in contact
with them with perma
asking... and you maima ...
have also given
befruchtete eggs into the

sand what gets answered
by ascende... i believe so, i
felt through my extension
penetrating her how she
shuddered samewise as
you when you gave out the
fertilized eggs when maima
says... yes i too have a
mini egg factory working in
me what i have copied
from you as there is a
strong wish in me to help
fulfill ascendes wishes as
the male of our group...
not that he would be
dominant, but his balls

seed factory and expulsion
joy force have a good drive
for our project to fertilize
this vast desert when
ascende asks maima... but
you could have copied that
too and become a male
seeder too yes maima
sends... but then as perma
does not likes too much of
her being penetrated too
strongly, i felt that i could
do that for us... hold my
butt to you so you can give
it to me hard
isfuedelifescht

mmmmmhhh... oh i get
horny again.... asende
moans as he receives
maimas signals perma
sending now... let me this
time be the one who is
ejaculating my load into
your vagina ascende ... ya,
he sends ... i will copy your
egg preparing mechanism
and send out the eggs
fertilized by you both
maima and permas
delivering your hot white
seeds in me

13

saharandesertborne

13 the first generation
of elemental enhanced
humanimalplant beings
born from maimas and
permas eggs in the
saharan desert ascende
perma and maima were
resting from their slimy
loveplay discussing their
male female reproduction
organs and how their

psychological states of
minds were influencing the
next generation of
elemental enhanced
humanimalplant beings...
through their mating
behaviour... preferences of
how one likes to be and go
inside a fellow being...
giving or receiving or any
active passive combination
of body forming
exercises... but wait ...
they have not yet
discussed into detail their
imprint on the behaviour of

the next generation...
maima.. for me it is the
first time watching a
descendant generation, i
am so happy to see them
being sovereign from the
moment they left mine and
permas body... perma...
yes i remember me and
ascende being in the pool i
gave birth to you as white
balls ... we were leaving
the pool then so that you
could have enough
playspace to discover
yourselves and what you

wanted to be ascende...
but still... i rember... us
projecting our wishes too
onto maima, while we lay
beside the pool and
occasionally touching
caressing maima in a
nonsexual but tender
supporting way maima...
now you bring up these
times i find in myself
notions of me at this first
hours of me being spread
over a collective of dozens
of white balls ... receiving
your wishes while your

supporting arms in the pool
were layed out to which i
could go to when i was
playing with the several
balls i was born the
organisation of the several
white balls into a collective
coordinated formshaping
body was greatly helped by
that short moments i swam
into your arms and got
access to your soul
informations of course the
big part of essential
humanimalplant
informations were stored in

me as egg from you perma
with your sperm ascende
having it fertilised your
both informations being
humanimalplants ones ...
in the pool with the
microalgae cannabis
mushroom intelligences i
was well informed too with
their psychadelic
connections to the cosmic
streams of life... but still it
was a strong impulse
touching you in my very
first days of life ascende ...
when you very quickly

matured ... i saw my
wishes well in you realized
... i was happy for that...
and i thank you for helping
me to fullfill this fantasy
where you grew yourself
into a body what had
cannabis flower buds all
over juicing thc while we
had a pleasent sexual
intercourse perma...
yes,that was maimas first
sexual intercourse after it
had formed itself into a
female styled
humanimalplant being...

and we were surprised that your childhood was advancing so fast, with you maturing quickly at the time we stayed out of the pool offering at some times our arms to hold and nourish you emotionally and us too... ascende... as we were at the times no more purely human beings but already evolved into a mix of human animal and plant genetic makeup... we were only mildly surprised to see your childhood only

lasting some days... in
animal worlds are some
species what are
geschlechtsreif able to
reproduce themselves in a
very short time too
maima... and now it looks
like it is even shorter.... as
we are watching the very
first generation of
elemental enhanced born
humanimalplants as they
are continuing the wetting
of the desert like we
started it... i wonder how
we want to see ourselves

in relation to these our
descendants... will we
send them our fantasies
too like you did to me
ascende... with me being
bytheway totally okay with
your doings as i have
picked them up willingly
and was happy to engage
with you in our pleasurefull
sexual plays after i
matured to what the
humans call adulthood
perma... i was not sending
my fantasies to you as i
was content with the

loveplays ascende and me
have experienced in the
pools together... but did
not feel like you and
ascende were doing
something unhealthy
together... as we three
have evolved even further
into elemental enhanced
humanimals and see this
eggs having left us some
hours ago already growing
themselves into palmtrees,
being lakes and grass and
flowers... snails and desert
mouses i believe that they

do not need our attention
nor we need their vital
power to fulfill our needs
ascende... mmh ... sounds
like i would have done a
mistake when i was
subcounciously sending
out my cannabiscopulation
fantasies to maima with
maima coming in between
them ... what i have picked
up being curious what fun
and satisfaction your
ascende desires could
deliver to my own evolution
we are not now discussing

mistake or no mistake but
what perma and me are
trying to research in our
round of three ... is... what
could our possible direct
interaction with this totally
sovereign first born
generation of elemental
enhanced
humanimalplants be...
ascende... sorry perma for
thinking you would accuse
me of being a bad
rolemodel for a freshly
matured being... perhaps
there are some doubts in

me from my time as a
purely human being before
i was meeting perma at the
pools, when i was
androgynous perma,
you are excused and
forgiven already as we
have found in our round
that maima was happy
having your fantasies as a
possibility to engage with
us what do you propose ...
shall we leave them alone
or are there any
possibilities we could learn
from them... maima... of

course there are, imagine
if we could have access to
their genetic knowledge ...
how our eggs and seeds
again will become quicker
to mature and even more
sovereign in their actions
to heal the planet...
perma... yes right you are,
there is this vast task of
the deserts being greened
in order to give a place to
all the refugees migrating
the planet looking for a
place where they can
flourish without fear of

being hurt ascende... i
believe that this
generation, these our
descendants from our
trio... will perhaps still have
some of our human topics
with them as we at their
birth still were on the quest
the search of male female
balance but that they are
right busy working on the
greening of the desert... let
us watch some times and
perhaps even mingle
ourselves with them if they
are searching contact with

us... but let us also
continue in our trio the task
of me becoming the
female sex and my switch
from producing eggs while
before was for a long time
producing semen perma...
so yes, we spend some
time in our trio coming full
circle with maima and me
growing testicles and
seeding you... mmmh... i
feel my schamlippen
female genital lips already
coming together to form a
kind of evolved penis... like

the plant sarracenia
oreophila... what is a
fragile thing, not made for
fucking wildly but to
smoothly enter your vagina
and anus my dear
ascende and to deliver in
you great amounts of my
sweet honeysuckleish
essence maima... where i
will grow myself a thick
meaty prick i will satisfy
your desires to be strongly
pushed into, as you did to
me so well donating me
thisway much orgasmic

moments of being used
thoroughly ohoh ladies ...
ascende now sending.. or
should i say horny
stallions... you are causing
my penis to fall apart in
two halves to form a vagina
what will satisfy your most
interesting offers of
penetrating me... perma...
so here we are, already fit
and composed enough to
engage again into losing
ourselves in each others
embraces and sexual
welldoings... maima... well i

agree, we better get one
with having you fucked
properly in all holes, as you
are already getting your
vagina built ... and my
whale bulls inspired penis
is also quite ready growing
and i feel like filling
someone with it
completely... mymy maima
...perma jokingly ...what a
bully you can be oh i see
you drilling your massive
thing into him... make sure
you get it into his ass right
up to his brain ... as this is

a human imagination what
only now becomes
possible... we can put
brains in our bodies
wherever we like to place
them ... we might even
experiment with brain cells
growing in a special layer
under our swelling muscles
... when we could right
massage each others
brains with brains....

14 elehumans going techno

14 elehumans going
techno while ascende
perma and maima were
exercising themselves in
the gender role model
switches in order to
balance out each ones
male female equilibrium...
the first born as elemental
enhanced humanimalplant
beings

sahabornelehumans were preparing the saharan desert to be a home for all the human and animals of this world who did not find themselves to be welcome and or treated with the respect a human as well as an animal being deserves the saharan elehumans were kind of everywhere so when some similar injustice was on its way to happen like it happened in the world sadly enough many times

at many places ... perhaps
most of the paining
happenings not coming
from one really wanting to
cause pain but out of an
uncounciousness deficit
one needs to fill...
somewhere on ones way
one got hurt and eventually
one will transport this hurt
onto someone else with or
without knowing that one
does so also an other
reason for a deficit is a
lack of flexibility in ones
mental emotional and

physical body... like
thinking too much of a
trouble or reliving the same
traumatic moments and
sitting too much in a
cramped body position...
deficits can happen too in
a situation where a strong
wish of someone does get
nearly enough realised in
ones life... one being
distracted from ones
concentration of reaching a
particular goal...
distractions what
eventually are caused by

stuff what one would want not to be in ones life but they are probably showing one where his/her service could be found to benefit the greater cosmic community of all beings knowing this because they have been purely humans too and they still can access the human mass consciousness... the saharan elehumans were sensitive to the newly arriving human and animal beings treating each other

nice and respectfull they
did not police the place like
standing at the crossroads
watching everyone to walk
in line... no, they could
sense what the problem
was somehow about and
fill the gap with their
capabilities to be any kind
of substance lifeform
shape object subject of
possible existance ... so
there was a saharan
elehuman being serving a
newly arrived small time
thief or a merchant or

basically any character what
has felt the need to possess
more security in form of
money or trading goods...
so when the
sahabornelehumans
sensed such a lack of
abundance in a visitors life,
they created the remedy
from their own
bodysubstance ...its bodies
forming all the riches the
person was longing for...
mountains of gold, palaces
of marble and what more
one can imagine of

luxurious splendour to
possess... usually the newly
arrived person did learn
quickly to let go of this
riches given to him
unconditionally ... no one
took the gold with to go
back to the cities of the
purely humans... in the
areas stimulated by the
sahaborne humans was
no shortage of food and
shelter most everyone was
most of the time happy to
occupy oneself creating all
kinds of fantastic

manifestations... with the
saharan elehumans
serving as the wizzard or
gene who formed
something out of thin air ...
what was actually like that
partly as the elehumans
have learnt to recycle the
co2 as well as the nitrogen
and more stuff the humans
have emitted thanks to
their inefficient burning of
materials some of the
purely humans visiting the
stimulated greened desert
places were bringing their

animals with to discover in themselves after eating from the fruits and vegetables of the stimulated places that they just as well could release the animals this food here was so nourishing and wholesome that they would need neither eggs nor milk nor meat anymore food being grown from elehumans was so strong because they were putting themselves into the trees from time to time to

strengthen its growth also
they lay themselves in fine
mists of elehuman watery
substance over the
vegetables in the mornings
as to water and inform
them of elehuman genetic
immun system
informations some purely
humans stayed a week or
a month, some years
before they decided to join
the elehumans with giving
them either their word...
yes i want to leave the
purely human state and

enter an evolutionairy
broad road what leads to
one becoming a being able
to be hot as a blue flame
while having a core of an
iceblock ... i wish to be a
being what can form its
body picking from all the
genetic informations what
are embodied on this
planet or they could just
offer the
sahabornelehumans their
semen or vaginal
ejaculation fluids as a
contribution to the

community as well as a
decision to mix with the
elehumans beyond food
but to take up their semen
and eggs too for example
one purely human is
curious and thinks why not
try this elehuman thing, i
have been purely human
long enough... so one can
imagine that there would
be several ways to deliver
and take on semen and
vaginal ejaculation fluids...
sucking it off the
elehumans something

some purely humans preferred, others imagined being a flower what sends out its pollen with the wind and be fertilised by air transported pollen coming on oned fruchtstempel in fine mist the sahabornelehumans liked these scenarios as they were much further near the plant worlds in their genetic makup with a little animal and lots of elemental forces in them when then such a dreamer

purely human closes its eyes and sees him/herself being a flower sending out pollen and getting dusted with the ones from elehuman flowers, the sahaelehumans misted their bodies into such a dust them taking on a airy fairy low density for the finest purely humans ... while with others hanging onto their sex experiences before ... needed some rubbing of genitals with a dense cloud forming itself

into fingers with swelling
muscles behaviour pulsing
like with blood ... what
made the densely caressed
purely humans climax and
ejaculate their male or
female most inner juice...
some of the purely
humans did not want to
change ... and went back
to the cities telling others
or not... but millions came
and the television drones
were now entering the
zone, what was quite
exciting for the

sahaelehumans as the
knew that there would be a
chance to help the purely
humans with their
technological progress why
would the sahaelehumans
want purely human
machines to evolve... first
because every progress in
technology bears the
possibility of more people
being allowed to take leave
of having to work a job
they do not like ... and the
sahaelehumans hoped that
when the drones fly back

to the purely humans cities
for maintenance, their
engineers will discover
their elehuman enhanced
circuits and some files in
the enhanced software
operation systems what
would explain in detail how
materials could be created
what are billion times more
efficient in electricity
conductance ... the new
code languages within the
camera electrobirds will
enable their computers to
grow their processing

speeds samewhise a
million times... as this code
was so simple and going
the most fluent way ... the
television networks had
hundreds of drones flying
constantly now over the
saharan lovefest of 2020
and they noticed after only
a couple of hours of the
cameras sending via
satelite broadband
connections.... that the
quality of the pictures was
increasing by the minute....
like... they sent drones

what could record and transmit 200 x 300 pixels in realtime... when it was at 20 thousand x 30 thousand pixels within one hour and 20 million x 30 million 3 hour later delivered in completely new algorithms what could be delivered through the network channels but not analysed... kind of the purely humans decoding the signals were not grasping the logics of this newly composed picture

data.... that was when some of them decided to quit their jobs and visit the lovefest to ask the elehumans if they would explain this new software to them... as obviously the improvements of the picture quality must have been a connection with something elehuman as they arriving at the saharan lovefest the elehumans were most happy to teach them... one method they offered that

the programmers were relaxing their minds so that in a meditative state the elehumans could send the code telepathically, what they had written the drones new operation system this was happening on the subconscious level at some purely human coders meditations while others saw the new coding language being explained by the elehumans in their dreams before their inner eye while relaxing their

bodies in pools ... some programmers chose to become elehumans and for them it was the quickest and easiest learning of vast new knowledge they had ever encountered... like the learned all the dna alife from billions of animal and plant species plus all the human stuff with on top of it all the very coreness of fire water earth and air... and this coders now elehuman coders were no

more interested in
disassembling the drones to
see what kind of new
hardware the elehumans
have transformed the
before purely human
motherboards in they
wanted now to build alive
computers meaning flesh
and plant tissue based
blue flamehot icecold
formed flying cameras....
so they invented with their
own body substance again
million of times more fluid
and smoothly operating

drones with a power consumption of miliwatts and an picture qualities of new clarity and a broader visual spectrum broadness ... these cameras recording all kinds of waves like infrared and the aura of humans animals plants... they were human coders a half a day ago and now they were elehumans droning the skies with dozends of parts of them being the first truly organic alive robot

cameras who could fly the
next they did was
multiplying their parts
gaining mass out of the
infinite pool of cosmic
energy and building
satelites or organic drones
what orbited around earth
in the near space beyond
the air belt atmosphere...
with some organic drones
flying into the purely
human settlements
transforming themselves
on the way into tv sets
displays of all kind of sizes

they too multiplying and
gaining mass around 100
000 of these displays were
arriving in the settlements
placing themselves
decently where it would not
disturb purely humans
ways and they did not only
displayed what happened
visually at the saharan
lovefest as this was done
by all the purely human
drones but they opened
the watchers a interactive
experience the organic
drones now displays too

were also inviting to transmit informations via skin contact like... a purely human what was discovering a tv set at a place outside near the settlement he lives could cuddle him/herself in the organic cameradisplay elehuman thingie like in a blanket and the elehuman blanket would touch the naked purely human learner in ways what were desired by the learners... some got horny while

feeling the life fleshplant
blanket cuddling and saw
before their inner eye the
blanket entering their
vagina and anus and
rubbing ones penis others
were just laying still in the
blanket enjoying elehuman
dreams told in all sensual
ways.... sounds smells
touch and taste with inner
visuals some did not leave
the elehuman blankets but
chose to become
elehuman too... this ones
were then again inventing

themselves anew to
become all kinds of helper
organic machines what
would offer the purely
humans in their daily tasks
some few days after the
first cameradisplay then
blankets landed in the
cities, the number of
converts began to
multiply most quickly...
kind of half the people
living in the big cities chose
to be elehumans with
nearly all of them
dedicating their body

designing powers to aid the other half of the population doing household tasks and producing things within a week was no more food being produced the old way ... elehumans have shown the farmers their techniques to grow vegetable fruits and grains... and they could deliver a few thousand of kilograms what was enough the population of a 20 million city... now a 10 million city as the

elehumans were not
needing to eat a fruit or a
vegetable also cars were
standing still some days
after the elehuman visit in
the purely human cities...
nearly all of the purely
humans were enjoying the
elehumans serving as
transport vehicles in all
kinds of forms... from
horses to bikes to carlike
forms and velocity
performance perhaps one
could say that within a
month after elehumans

starting to serve with their bodies as machine replacements.... there was noone on planet earth who was hungry or suffered from being without shelter with elehumans now in the numbers of billions and multiplying gaining mass consuming ever renweable cosmic energies... the old concepts of buying things scarcity and fight for survival lost its existance every purely human who was still wanting to eat and

live in a house wear
clothes etc was now
enjoing elemental human
assistance with vast flying
palaces ... where little
rivers were flowing down
100 meter high
minimountains within the
ship... fruit orchards with
vegetable mixed culture
landscapes grains growing
on stems between the
vegetables , also
mushrooms and cannabis
plants... the temperature
inside the alive elehuman

flyships could be set as desired by the purely human passenger although the elehumans performed most of the wishes for the purely humans, they would not allow the purely human passengers to think that they would own these creations their ex-fellow human city inhabitants now elehumans have formed their very personal bodymass into so... life for all purely humans changed in contact with the

elehuman machinery...
there was no more work
what was expected from
anyone nor any shortage
of food or protection
everyone now could stay
at a place on earth feeling
cosy in a 50 diameter big
flying houseship or fly
higher with a ship hundred
times bigger in size

15-creating an other timeline

let us leave the lovefest 2020 and travel back to create an other timeline about 2018 ascende and perma meet at the pools in these two years 2018-2020 while they were evolving at the pools and flying around... the purely humans in the cities were researching a

lot and with speed on machine intelligence robots were learning by themselves they too got into the dream of a living material what they called programmable matter the robots were in 2020 just about ready to do most of the tasks in society what previously required a lot of people, most of all transportation got automated with self driving cars and trucks and planes they did approve of the

overunity energy devices
like

LowEnergyNuclearReaction
LENR and the SEARL
device and made millions
of copies of this phantastic
technologies, replacing
thisway all of the fossil oil
or gas burning motors and
heating systems the
SEARL device was
especially helpfull to make
the step from automated
self driving cars to self
driving spaceships so in
2020 people were seeing

all this phantastic robot technology on the market perhaps 20 percent of the humans on the globe were able to buy these machines some months later, the first generations of the highly sophisticated airships, cars, android companions were sold.... the huge amount of money now released to the producers were enabling them to sell better versions at a 10th of the price, thisway again allowing

another 30 percent to participate in this automatisisation surge.... while now half of the human population was quite autonomous with the machines driving flying them anywhere they wanted to be, perhaps having 10 robots working in ones greenhouse or wood carving workshop.... the other half of the people were helping themselves to participate in the end of salary slavery... plans of

the devices plus some
dissassembled devices too
were being studied similar
devices were built by half
poor half rich people who
had compassion with the
poor their machines were
sometimes even better the
nation states were clever
enough to keep
themselves out as much
as they could, some long
time state employees
witnessing with great joy
how society took the turn
to solidarity when it

became obvious that there would be no more need for police and military as a thick nourishing carpet of abundance was being rolled out in 2021... enabling everyone to live on its own ... picture everyone with a 50squaremeter flying ship what has food production inside greenhousestly... the people everywhere on the planet were using less and less of the nation states infrastrucure with

new politicians being
elected now which did shut
it all down to a minimum ...
healthcare, learning,
selfdefense, righteous
behaviour in society... the
people were helping each
other directly
spontaneously or regularly
in myriad different ways
they agreed to mutually no
more taxes were asked as
the people everywhere on
the planet shares their
produces with great
pleasure oftentimes the

trading of self designed items of daily use made by the robots one has bought or was donated too... the trading itself was an adventure and very rewarding quest, so many possibilities to find trading goods with their unique producers with whom one could get in a unique relationship as to why one would want exactly this custom item from this artist producer without great trouble the transition

from the age of scarcity
scarcity into age of
abundance happened
when ascended perma and
maima were starting the
saharan lovefest most
human beings had found a
vegan diet most
comfortable for their life
and many were happy with
the world as it was, with
free energy robots and
autonomous living and
producing infrastructure for
all humans but then there
still were about a billion

people an eight of all what
found themselves to be
meant an evolving being
and wanted to ascend a
ladder higher by becoming
humanimalplant elemental
enhanced ones they left
their autonomous ships
and cars and robots and all
this producing consuming
transactions to join in with
the saharan and following
lovestests they themselves
wanted to be their plain of
air with car ma and row the
boat pro ducere to lead

trough ... why would one want to make a hole in mother earth to take out metal ore to build a robot companion ... if one could learn to transform ones very own body into tools for transportation and fabricating things ... rowing ones own boat ... being ones own robot... by connecting to the full genetic spectrum of all fellow life forms on this planet ... and how does the ability to do photosynthesis

with ones own skin
compare to a machine
sitting beside oneself to
extract energy from the
cosmos to power ones
robots... the robots
needing to tend plants to
be eaten... comparing to
be this tomato to be this
strawberry in parts of ones
own body... potatohead
with potato skin over ones
face... instead of growing
them and cook them
alive... of course the fruits
fallen from trees and nuts

and seeds are dormant
what means they probably
feel less pain when being
grounded and cooked
compared to a cabbage
being beheaded on a field
as there was no human
being hungry or without
shelter in 2020, people in
general were satisfied with
the achievements the
human race has reached
with not killing each other
anymore, the gift economy
and everyone being
autonomous with how one

wanted to live a material
life the 12 percent of
humanity what has chosen
at 2020 to become
elehumans ... were
finished with the material
cycle possessions and
trading and all they were
longing for a next intensity
of abundance... with
access to all planetary life
forms dna and being able
to redesign oneself with
combining them any
suitable way at any
moment anew... this

abundance is on a deeper level than the free energy machine, the elehuman reformation reforming powers are tapping into the same field of energy but just directly in ones own soft flesh body

16- opening up an other possibility in future events to happen with thinking about it

16 opening up an other possibility in future events to happen with thinking about it... ascende maima and perma were now occupying themselves with researching their male -

female balance as they saw their offspring the saharaborn elehumans... doing so well fertilizing the desert making a home for who looking for peacefull existing evolution... wether as a purely human or as an elehuman... we might have a peak into this sexual plays of the three later as now there is a possibility of the do it yourself maker community becoming a leading force in preparing the advent of

a marvellous future where machines and other living organic beings coexist in 2018 there were roboters available at a price of 500 money items with about 60 percent of the global human population being able to buy one... some had to save half a year for it, others bought 3 with their savings they had already reserved this humanoid robots had a sophisticated build what was inspired by a robot

developed by the ETH Zurich in 2013 ... there were mechanisms what worked like the human muscles and tendons... built on top of it was a layer of tissue what was grown from the human cells donated by the person who wanted to spend time with this particular robot the tissue also having skin like features the artificial intelligence of the metal and plastic brain

processors allowed these robots to copy all the moves their human compaignon would show them... with the added possibility to design any combinations of actions what would be needed to perform in an event where the human compaignon would not be available for demonstration of course there were at the beginning half the people training their robots taking them with during all the

daily tasks beginning from preparing breakfast driving to work, doing the work, shopping ...to come home with the robot and leave him/her doing their own thinking and processing the daily input there was in 2018 about 10 000 really committed hardware enthusiast on the planet what were tinkering around with the robots beginning the day they got them they were modifying the inside metall plastic

parts, as well
experimenting with new
kind of tissues when they
got news over the internet
from a visitor of the
saharan newly greened
areas some thousands of
this diy makers were
preparing their visit to the
saharan lovefest within a
week they read about it
what possibilities might
there be to learn from the
elehumans as to improve
the robots and they were
welcomed by the

saharaborn elehumans,
who were all for it to let the
purely human technologie
enter the area the makers
were not only bringing their
robot experiments with but
also their 3d printers and
human tissue growing
bioreactor labs this
especially was of interest
as they sensed that there,
in the fluid area of flesh
and muscles and bloodlike
nutrition information
transmitter fluids might lay
the future of the robot

hardware the sahara born
elehumans were seeing
human technology for the
first time, but they had the
memories of their parent
generation ascende maima
perma ... partly... as not to
be burdened by the
individual informations... so
for them this was mostly
positive and exciting
possibilities to transfer
elehuman ness to
eventually a next
generation of planet
settling robots they offered

the makers that they may have some of their very cincentrated life substance and use it for their research... provided they would not willingly destroy the life part of them, but take greatest care with their experiments with many makers being very gratefull to accept this donation of alive substance what could also take on any desired form and even talk... in the minds of the makers this was like

having an elehuman
organic robot what they
could take home eventually
to further learn its wisdom
some of the makers never
left the greened sahara
again and became
elehumans themselves
with their machinery and
lab equipment becoming
elehuman substance...
others stayed there for
several months before
they went back into the
cities to share the progress
they achieved integrating

elehuman substance with the purely human built hardware some positioned themselves just far enough outside of the lovefest where there was internet satellite connection was available in the greened sahara regions all human radio or satellite broadband waves were not working ... and mail delivery for materials and maschine parts of other regions of the globe it was around 2022 when the makers

who have been in the
saharan greened areas
were having achieved an
enough sophisticated
combination of elehuman
substance and purely
human built parts... that
the saharan elehumans
were agreeing to offer
these new generation of
robots to the masses... not
that it was not everyone
who came to the lovefest
could not take some alive
elehuman substance with
when visiting out of his/her

curiosity or true search for evolution... but in 2022 the elehumans felt that this combination design now of plasticmetall parts with elehuman substance optimally integrated, that these machines were sophisticated enough to have their blessing one main reason for them to agree with the makers who prepared to release the complete design process of the last two years... not that it was not online all the

time they worked on it.. but now it was all explained and enabled anyone with standard 3d printers at home to fabricate a robot themselves with them having both the possibility to go to the saharan greened areas where one elehuman would donate some of its alive body substance as to be integrated into the purely human built hardware or one could send ones robot to the green sahara by

others who offered this transportation service the design of this robot now was this highly developed that it would allow only beneficial acts to perform with the human built chips now very intuitively connected to elehuman wisdom what cuddled them through the alive substance embracing all the plastic and metall parts in 2022 around one third of humans have become elehumans in the lovefests

two third having elehuman
enhanced robots what did
all their chores and on top
of it were being very
ecologicly aware and
gentle with all fellow
creatures... while an
elehuman substance
enhanced robot would
serve some raw tomatoes
it has grown for its purely
human companion, it
would not kill an animal
being ... most of the purely
humans these days were
enjoying the delicious raw

vegan food ... with only a few purely humans tending livestock cows pigs etc to kill them themselves and eat them most of the animals being kept as pets and for human or pet consumption were given free leave these days when every human had one or several robots as companions robots what were partly elemental enhanced humanimalplant substance these animals were joining the elehuman

way via the elehenhanced
androids wherever the
animals what roamed
around free met an
enhanced robot in a time
they did not serve the
purely humans... the
elrobots offered the instant
evolution step by them
giving some of their
substance to drink to the
animals... only some drops
where enough for the
animals to gather with
fellow animals of all races
to celebrate their very own

lovefests untill they
reached a level where they
met naturally with
elehumans elehumans
these days in 2022 were
spread over all continents
busy offering everyone
services what would make
life easier we are now
counting around 4 billion
elehumans, 4 billion purely
humans with around 20
billion partly elehuman
enhanced machines and
30 billions of animals going
the elemental enhancing

road.. what makes it quite
logical that the trend will be
that more and more purely
humans will convert to the
elehuman path for
example... some purely
humans who had sex with
their elehenhanced robots
were converting just with
them soaking up elehuman
substance during
intercourse with the
elehenhanced androids
others were asexually
contemplating their lives
coming to conclusions

what makes it selfish to continue using mother earths resources and eat fruits and vegetables when there was an easy going flow to be this plants oneself and not be any more hungry after their vital data projecting this into the coming years... again 3 of the 4 still purely humans converted in the years up to 2030 with all their machines and gadgets partly becoming mass they could use as

elehuman substance kind
of ... one day a purely
human decides to go
elehuman... the
elehumanenhanced robot
then offers to be eaten
drunken partly with again
only some few drops being
enough for the process
becoming initiated... within
minutes the body adapted
to the informations stored
in these few drops... and
when complete after an
hour or so... the newly
convert has the choice to

gain its mass with kind of eating the metalplastic parts of the robot there is still one billion purely humans left, most of them eating very modestly, doing most of the works themselves like gardening and housekeeping, cultivating vine, archery and drawing pictures on paper... their elehenhanced robots do only a few tasks and enjoy most of their time in being with whomever they like..

visiting lovefests, traveling
the globe...
